

The kitchen that lets the home cook do more using less.

GE's ecomagination kitchen package can help reduce electricity consumption in the average U.S. kitchen by as much as 20 percent.*

- 1 Dishwasher:**
10% reduction in energy and water use by using a GE ENERGY STAR®-qualified dishwasher¹
- 2 Refrigerator:**
20% reduction in energy use by using a GE ENERGY STAR-qualified refrigerator²
- 3 Microwave Oven:**
20% annual reduction in energy using the PowerSaver feature on GE over-the-counter microwave ovens³
- 4 Oven:**
25% reduction in energy use by using the smaller oven 50% of the time⁴

* Total projected kitchen energy savings of 20% compared to standard appliances.

- 1. Reduction in energy and water use as compared to non-qualified dishwashers.
- 2. Reduction in energy use as compared to non-qualified refrigerators.
- 3. The Power Saver feature reduces energy lost during standby mode.
- 4. Compared to GE's 5.3 cubic foot single oven.
