

COOKING WITH CONNECTIONS

Real life starts with real cooking. And the best cooking starts with fresh ingredients, thoughtfully designed appliances and connected capabilities that make it easy.

FULL-COLOR TOUCH DISPLAY

The new GE Profile™ wall oven features a 7-inch, full-color, brilliant touch display, allowing you to easily cook food by type.

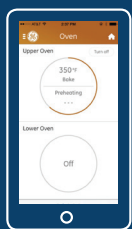

IFTTT

Pair internet services to your connected appliances, triggering an effect if a certain action takes place. For example, “If the oven is preheated, then send me an email.”

PRECISION COOKING PROBE

Achieve restaurant-quality results with a probe that easily attaches to your existing cookware, wirelessly controlling the temperature of your food.

GE APPLIANCES KITCHEN APP

From preheating the oven to setting a timer and checking the status of your food, you can do it all from your smartphone.

CHEF CONNECT

Bluetooth® pairing allows your over-the-range microwave to communicate with the range below it. Sync clocks seamlessly, or set your microwave's light and vent to turn on when the range burners do.

DROP RECIPE INTEGRATION

Preheat and control your connected oven from within a recipe inside the Drop Recipes app.

VOICE CONTROL

Easily interact with your appliances—hands-free—with Google Assistant or Amazon Alexa.
