

## Meet Members of the HII Family Health Center Staff

The HII Family Health Center staff will soon be moving into their offices in the new facility. The 21,000-square-foot Family Health Center is scheduled to open its doors to patients at the beginning of March. The center will offer primary care, physical therapy, X-Ray, pharmacy and laboratory services to eligible employees and their covered dependents.

The center will serve patients six days a week. Continue to check *Currents* for updates on the health center opening.

### William Hurst, MD

Family Medicine

"My goal as a family medicine physician and a leader within our team of dedicated professionals is to provide the highest quality, comprehensive healthcare for our patients and their family members with additional focus on improved wellness, health education and prevention."

### Morgan VanDerHorst-Albaugh, MD

Family Medicine

"I believe that the foundation of excellent healthcare is a trusting patient-physician relationship. Being a family physician provides me with a unique ability to build these relationships with the entire family. Using communication, teamwork, and a strong commitment to disease prevention and management, we can achieve optimum health for every member of your family."

### Beverly Withers, FNP-BC

Family Medicine

"Preventive healthcare is a vital key to quality of life. As the population ages, health screening, monitoring and managing adverse and natural health conditions are paramount. As a board certified nurse practitioner, my ultimate focus is development of individualized care plans with my patients to afford them the best possible quality of life."

### Derryn Bray, DPT

Physical Therapy

"As a physical therapist, I am passionate about helping others rehabilitate from injury and surgical procedures. I heavily believe in educating a patient and using evidence-based interventions to treat. By utilizing a functional and patient-centered approach, I feel that I am providing my patients with the opportunity to achieve their maximum rehabilitative potential."

### Miranda Hayden, RD, CSR

Nutrition Services

"I desire to help people understand their true selves through adequate nutrition and exercise! Nutrition and exercise go together, and one without the other is like a missing piece of a large puzzle. I am delighted to help people obtain nutritional goals and help them strengthen their ability to make adequate decisions for a healthier life!"

### Clara Schneider, MS, RD, RN, CDE, LDN

Chronic Condition Management

"Patients are people with unique concerns about their own health. These concerns must be addressed as part of their care plan. Diabetes care is about teaching the patient ways to positively manage their diabetes and comorbidities they have so they can be as healthy as possible."

Progress on the HII Family Health Center, located on Washington Avenue, continues. When the facility is complete, it will have 19 exam rooms, two pediatric exam rooms and five speciality exam rooms. Photos by Chris Oxley

### Rich McClelland

Health Center Supervisor

"I believe that achieving physical health and wellness requires a team approach. In my experience, the greatest

outcomes of care have occurred when the patient, provider, staff and family member are all working as a team."

### Dan Naumann, MD

Medical Director

"Our office will be inviting, peaceful, friendly and very confidential. We want you to feel at home. With your input we can

make solid individual health decisions for a better quality life and a longer life."
