

The Dunkin' logo is displayed in orange and white.

# Espresso Beverages

- Dunkin' first launched espresso in 2003 as a way to give its guests even more coffee options.
- All of Dunkin's authentic espresso beverages are made with espresso beans that are 100% Rainforest Alliance Certified™ and selected from the finest, high-quality Arabica beans.
- Dunkin' freshly grinds & brews every shot of espresso for each drink. We steam the perfect amount of milk and foam for each espresso beverage.
- Dunkin' menu of espresso selections includes espresso shots, Hot Americano, Hot Cappuccino, Hot and Iced Macchiatos and Hot and Iced Lattes, which are available in indulgent flavors such as Caramel.
- Dunkin' Hot and Iced Lattes combine a single shot of freshly brewed espresso and milk. Any hot or iced at Dunkin' are available with flavor swirls and are topped with a drizzle of syrup, delivering a creamy and delicious beverage. Whipped cream is available upon request for our Iced Lattes.
- Dunkin's Cappuccino combines a shot of freshly brewed espresso and steamed milk. It is topped with a frothy layer of foam. Every sip is full of bold flavor with the balanced by the taste of dairy.
- Dunkin's Macchiato is a handcrafted, layered espresso beverage made with steamed milk, then topped with a double shot of Dunkin's rich, freshly-brewed espresso. Macchiatos can be customized with any of Dunkin' sweetened or unsweetened coffee flavors.
- In 2017, Hot Americano joined Dunkin's lineup of specially crafted coffees and espressos. Hot Americano combines two shots of Dunkin' espresso with hot water, creating a bold beverage with a rich, robust flavor.
- Guests can add a Turbo Shot® of Espresso to any coffee or hot chocolate beverage to energize you and help you make the most of your day.
