## San Onofre Community Engagement Panel to Discuss Security, Used Fuel Storage

ROSEMEAD, Calif., April 6, 2015 — The San Onofre Community Engagement Panel (CEP) will discuss nuclear plant security and storage of used nuclear fuel during its regular quarterly meeting April 16 in San Juan Capistrano.

The CEP was formed to advise the co-owners of the San Onofre nuclear plant on decommissioning the facility and to foster public education and involvement during decommissioning.

Tom Palmisano, vice president of Decommissioning and chief nuclear officer for Southern California Edison (SCE), majority owner of San Onofre, said the CEP also will welcome several new members on April 16: Glenn Pascall of the Sierra Club, who replaces Gene Stone of Residents Organized for a Safe Environment; Tom Caughlan, who replaces Larry Rannals as the Camp Pendleton representative; and two new city representatives, Dana Point Mayor Carlos Olvera and San Juan Capistrano Mayor Pro Tem Pam Patterson.

“The Community Engagement Panel has made significant contributions this past year on issues ranging from emergency planning to safe storage of used nuclear fuel,” Palmisano said. “We look forward to continuing this dialogue to ensure that safety, stewardship and engagement remain at the forefront as we prepare to dismantle San Onofre.”

The public is invited to attend the meeting from 6-9 p.m. at the San Juan Capistrano Community Center, 25925 Camino del Avion. There will be a public comment period and the meeting will be live-streamed via www.songscommunity.com.

SCE announced in June 2013 that it would retire San Onofre Units 2 and 3, and has begun the process to decommission the facility. SCE has established core principles of safety, stewardship and engagement to guide decommissioning. For more information about SCE, visit www.songscommunity.com.

**About Southern California Edison**
An Edison International (NYSE:EIX) company, Southern California Edison is one of the nation’s largest electric utilities, serving a population of nearly 14 million via 4.9 million customer accounts in a 50,000-square-mile service area within Central, Coastal and Southern California.
