San Onofre Community Engagement Panel to Discuss Off-Site Used Fuel Storage

ROSEMEAD, Calif., May 4, 2017 — The San Onofre Community Engagement Panel (CEP) will discuss off-site storage of used nuclear fuel during its quarterly meeting May 11 in Laguna Hills. The CEP advises the owners of the retired San Onofre nuclear plant on decommissioning.

The meeting will include updates on proposed interim storage sites in Texas and New Mexico designed to accept used nuclear fuel from sites such as San Onofre. In addition, two U.S. Nuclear Regulatory Commission officials from the agency's Washington, D.C. and Region IV offices will review federal oversight of decommissioning at San Onofre.

Tom Palmisano, vice president and chief nuclear officer for Southern California Edison, the decommissioning agent on behalf of the San Onofre owners, will provide an update on preparations to decommission the plant.

The regular quarterly meeting will be from 5:30-8:30 p.m. at the Laguna Hills Community Center, 25555 Alicia Parkway, Laguna Hills. Staffed information booths will be open from 4:30-5:30 p.m. There will be a public comment period and the meeting will be live-streamed via songscommunity.com.

SCE announced in June 2013 that it would retire San Onofre Units 2 and 3, and had begun the process to decommission the facility. SCE has established core principles of safety, stewardship and engagement to guide decommissioning.
