Community Engagement Panel to Meet Oct. 9 on San Onofre Decommissioning; Special Meeting Set for Oct. 14 on Storage of Used Nuclear Fuel

ROSEMEAD, Calif., Oct. 2, 2014 — The public is invited to attend next Thursday's regular meeting of the Community Engagement Panel (CEP) formed to advise the owners of the San Onofre nuclear plant on decommissioning the facility. The meeting will be from 6-9 p.m. at the San Juan Capistrano Community Center.

The meeting will focus on Southern California Edison's (SCE) proposed emergency planning changes for San Onofre now that the plant is permanently shut down and will include a presentation by a Nuclear Regulatory Commission representative. The meeting also will include opportunities for public comment and will be live streamed via www.songscommunity.com.

In addition, the CEP will hold a special meeting Oct. 14 to discuss plans to store San Onofre's used nuclear fuel in dry storage casks. On-site storage of used fuel is necessary until the Department of Energy takes possession of the fuel. This meeting is from 10 a.m.-12:30 p.m., also at the San Juan Capistrano Community Center, and will include opportunities for public discussion.

SCE and the co-owners of the nuclear plant established the CEP to serve as a conduit of information between the owners and the public throughout decommissioning. The current owners of San Onofre are SCE, San Diego Gas & Electric and the city of Riverside. The city of Anaheim is a previous owner. Current and previous owners are responsible for decommissioning.

SCE announced in June 2013 that it would retire San Onofre Units 2 and 3, and has begun decommissioning the facility. SCE has established core principles of safety, stewardship and engagement to guide decommissioning. For more information about SCE, visit www.songscommunity.com.

About Southern California Edison
An Edison International (NYSE:EIX) company, Southern California Edison is one of the nation's largest electric utilities, serving a population of nearly 14 million via 4.9 million customer accounts in a 50,000-square-mile service area within Central, Coastal and Southern California.
