Subject: SONGS Updates

Good afternoon CEP members,

Just a quick note to make you aware of some Congressional action this week regarding offsite spent fuel as well as a YouTube video produced by the NRC regarding SONGS.

Congressional action
Earlier this week, a group of 15 Congress members—including a number from the CA delegation—sent a letter to leadership of the House Appropriations Subcommittee on Energy and Water Development requesting that Congress spend $25 million for the Department of Energy to develop a consolidated interim storage plan. A story from the *San Diego Union-Tribune* (as well as a link to the letter) is available here.

NRC video
Earlier today, the NRC issued a tweet calling attention to a YouTube video produced by the NRC regarding SONGS. The video features NRC Region IV Administrator Scott Morris talking about SONGS fuel transfer operations. Comments are similar to those that Scott delivered during our March 28 CEP meeting. The YouTube video is available here.

We will continue to provide you with updates on matters related to SONGS decommissioning and fuel transfer operations.

Best regards,
Manuel

Subject: FYI - Holtec/NRC Meeting Today

Good afternoon CEP members,

Earlier today at Holtec's request, a meeting was held in White Flint, MD, during which Holtec addressed the "incidence and consequence of surface scratches" on canisters during downloading into the Holtec dry cask storage system. Attached for your awareness is the slide deck that Holtec produced for the public meeting. This was not an SCE meeting and SCE had no role in the meeting.

Back here at SONGS—as it relates to fuel transfer operations—we at SCE continue to provide information to the NRC that will be helpful to the NRC in reviewing our analysis of canister surface abrasions. The incidental contact that occurs during canister downloading, as the NRC recently re-affirmed, is not a safety related issue. All spent nuclear fuel at SONGS remains safely and securely stored.

Best regards,

Manuel

Subject: FYI - Congressional Tour at SONGS and Media Coverage on New Legislation

Good afternoon CEP Members,

Yesterday, we at SCE hosted Rep. Mike Levin and Rep. Harley Rouda for a tour of SONGS and a briefing on decommissioning. Following the meeting, the Congressmen held a news conference to address our discussions as well as announce planned legislation to prioritize spent fuel for movement once an offsite solution becomes available.

Here are hyperlinks to a few stories stemming from the Congressional news conference:

- San Diego Union-Tribune: https://www.sandiegouniontribune.com/business/energy-green/story/2019-04-16/levin-to-introduce-bill-giving-san-onofre-nuclear-waste-top-priority-from-feds

Subject: Reps. McNerney, Shimkus Introduce Nuclear Waste Policy Amendments Act

Good evening CEP members,

Good news. Congressmen Jerry McNerney (CA-09) and John Shimkus (IL-15) today introduced H.R. 2699, the Nuclear Waste Policy Amendments Act of 2019. The bill is very similar to H.R. 3053 from last year. Rep. Scott Peters (CA-52) from the San Diego areas was among the original co-sponsors. See the news release below from Rep. McNerney.

Best regards,

Manuel

FOR IMMEDIATE RELEASE
May 14, 2019

Reps. McNerney, Shimkus Introduce Nuclear Waste Policy Amendments Act

Similar legislation passed the House 340-72 in the 115th Congress

Washington, DC – Today, Congressmen Jerry McNerney (CA-09) and John Shimkus (IL-15) introduced H.R. 2699, the *Nuclear Waste Policy Amendments Act of 2019*. The legislation is similar to H.R. 3053, which passed the House of Representatives in 2018 with bipartisan support.

"Our country has a dangerous buildup of inadequately secured nuclear waste," said **Congressman McNerney.** "We need a short and long-term solution for the storage and disposal of nuclear waste. This hazardous logjam puts communities at risk and inhibits our ability to integrate nuclear power into a robust emissions-reducing agenda to combat the impending threats of climate change."

"This approach, which simultaneously advances interim storage and permanent disposal, is the only solution to our nation's nuclear waste stalemate that has gone through the legislative process and earned broad bipartisan support in either chamber," **Congressman Shimkus** said. "If we're serious about reducing emissions, the reality is nuclear power must remain a robust portion of our energy portfolio. But a failure to resolve the waste issue will compromise this key component of any serious proposal to address climate change."

Specially, the legislation:

- Assists in the resolution of the pending permanent repository license, which will allow the formal licensing process to determine if the Yucca Mountain site can be licensed and constructed;
- Reforms a broken financing mechanism to protect ratepayers and assure the Department of Energy (DOE) has adequate funding to construct and operate a multi-generational infrastructure project;
- Directs DOE to move forward with a temporary storage program to consolidate spent nuclear fuel from sites with a decommissioned reactor while work on the Yucca Mountain repository progresses, and prioritizes the transfer of spent fuel from seismically active areas to interim sites;
- Provides the State of Nevada and local stakeholders the opportunity to engage with the Federal government as the host State for the repository; and

- Protects our nation's national security priorities by providing the most expeditious pathway to remove "defense-waste" from DOE sites

The original cosponsors of the N*uclear Waste Policy Amendments Act of 2019* represent some of the 121 communities in 39 states where spent fuel and defense waste currently sits idle, as well as states that have no nuclear power plants. Original cosponsors include: Representatives Scott Peters (D-California), Jeff Duncan (R-South Carolina), Salud Carbajal (D-California), Debbie Lesko (R-Arizona), Lisa Blunt Rochester (D-Delaware), Fred Upton (R-Michigan), Bill Keating (D-Massachusetts), Rick Allen (R-Georgia), Mike Doyle (D-PA), Joe Wilson (R-SC), Joe Courtney (D-CT) and Troy Bladerson (R-OH).

# # #

Rep. Jerry McNerney proudly serves the constituents of California's 9th Congressional District that includes portions of San Joaquin, Contra Costa, and Sacramento Counties. For more information on Rep. McNerney's work, follow him on Facebook and on Twitter @RepMcNerney.

AN E&E NEWS PUBLICATION

NUCLEAR WASTE

McNerney, Shimkus carry on Yucca Mountain fight

Geof Koss, E&E News reporter

Published: Wednesday, May 15, 2019

Rep. John Shimkus (R-Ill.) reintroduced nuclear waste legislation yesterday. Bipartisan Policy Center

Yucca Mountain supporters in the House have unveiled new bipartisan legislation to revive the dormant project, which is further on the ropes after Democratic appropriators decided against including any funding for the repository.

The bill, H.R. 2699, introduced last night by Reps. Jerry McNerney (D-Calif.) and John Shimkus (R-Ill.), aims to ease the licensing hurdles for Yucca, which has been a political football since President Obama's Energy Department attempted to shut it down in 2010.

In a nod to the widespread concerns about spent nuclear fuel stored on-site across the country, the bill also would authorize DOE to launch an interim storage program to consolidate spent fuel at willing host communities.

"Our country has a dangerous buildup of inadequately secured nuclear waste," said McNerney. "We need a short- and long-term solution for the storage and disposal of nuclear waste. This hazardous logjam puts communities at risk and inhibits our ability to integrate nuclear power into a robust emissions-reducing agenda to combat the impending threats of climate change."

Shimkus touted the passage of similar legislation last year.

"This approach, which simultaneously advances interim storage and permanent disposal, is the only solution to our nation's nuclear waste stalemate that has gone through the legislative process and earned broad bipartisan support in either chamber," he said.

"If we're serious about reducing emissions, the reality is nuclear power must remain a robust portion of our energy portfolio. But a failure to resolve the waste issue will compromise this key component of any serious proposal to address climate change."

The measure is similar to a bill introduced last month by Senate Environment and Public Works Chairman John Barrasso (R-Wyo.) (***Greenwire***, April 24).

Efforts to revive Yucca are facing new uncertainty after House appropriators yesterday released a $46.4 billion fiscal 2020 Energy-Water Development spending bill that did not include any funding for Yucca (***Greenwire***, May 14).

When Republicans held the majority, they consistently steered funds to the project during the annual appropriations process, although the monies never made it into law.

But Speaker Nancy Pelosi (D-Calif.) promised freshman Nevada Democratic Rep. Susie Lee earlier this year they would oppose the project (***E&E News PM***, Jan. 4).

Rep. Dina Titus (D-Nev.) thanked Pelosi and top Democratic appropriators for opposing Yucca Mountain.

"This fight is far from over, but I'm encouraged by the support on our side," she said in a statement.

Nuclear Waste Policy Amendments Act Recommended Appropriations for Integrated Waste Management Storage

From: Amy F Pressler
Sent: Monday, May 20, 2019 7:33 PM
To: Manuel Camargo
Cc: Captain Mel Vernon; Daniel T. Stetson; David G. Victor; Donna Boston; Garry Brown; Jerry Kern; Jim Desmond (SD County Supervisor); Jim Leach; John Taylor (SJC City Council); Marni Magda; Martha McNocholas; Paul Wyatt; Rich Haydon; Supervisor Lisa Bartlett; Ted Quinn; Tom Caughlan; Val Macedo; Doug Bauder; Gabaldon, Joseph M; John Dobken; Juanita Hayes (SD County); Julie C Holt; KELLI GALLION; Kevin Walker; Larry Rannals; Liese Mosher; Lindsay Stigall; Lorraine Quinn Sandstrom; Marisol Eaton (SD County); Mike Sappingfield; Scanlan, Katelin; Steve Carlson (UCSD); Tanya Flink; Tom Palmisano; Victor Cao (OC)
Subject: Re: Reps. McNerney, Shimkus Introduce Nuclear Waste Policy Amendments Act

All,

As a follow up to my note from last week, the report language from the House Energy and Water appropriations bill has been released ahead of tomorrow's full appropriations committee consideration. On page 100 of the report it states "The recommendation provides $47,500,000 for Integrated Waste Management Storage, of which $25,000,000 is directed for interim storage activities, including the initiation of a robust consolidated interim storage program, including site preparation activities at stranded sites, to evaluate the re-initiation of regional transport compacts, and transportation coordination."
~~~~~~

While this language is part of the report with the base bill, we also expect the Committee to consider an amendment offering funding for Yucca Mountain as well. The amendment will be offered by the House Republicans on the Committee.

We will keep you all posted on tomorrow's Committee outcome. Again, many thanks to those of you who lent a hand on this issue.

Amy

Subject: FW: NRC news release re-authorizing spent fuel transfer at SONGS and announcement of webinar explaining same
Importance: High

Hello CEP Members,

I write to make you aware of an NRC announcement today supporting the re-start of fuel transfer operations here at the San Onofre nuclear plant. See the note below from Bill Maier of the NRC. The NRC also will host a webinar on June 3 to address the regulatory process associated with the re-start decision.

This is an important milestone in the ultimate journey to permanent offsite storage for the spent nuclear fuel. We at SCE look forward to the NRC's public webinar.

Since the event on Aug. 3, 2018, SCE and our contractor have performed a comprehensive review of spent nuclear fuel transfer operations and created a more robust program through better procedures, better training, and more intrusive oversight. This, in part, includes the addition of cameras and load monitoring equipment which will provide valuable information during download operations. We have demonstrated these improvements are effective and sustainable through numerous dry runs, regulatory inspections, and independent reviews.

Recall that SCE also has completed visual assessments of eight downloaded canisters. The incidental contact that may occur during canister downloading, as the NRC recently re-affirmed, poses no impact to the safe storage of spent nuclear fuel at San Onofre.

The ultimate decision on when fuel transfer operations will resume will be made following a careful review of operational readiness by SCE and our contractor.

SCE will continue to provide timely updates to the community and our stakeholders as we move through this process. Fuel transfer operations and what we at SCE learned about incidental contact during canister downloading will be the focus of our CEP meeting on June 5.

Feel free to share this important information with others in the communities around San Onofre.

Let me know if you have questions.

Best regards,

Manuel

Attachment #10 – NRC News Release - NRC Has Determined Fuel Loading Can Be Safely Resumed at San Onofre Nuclear Generating Station, May 21, 2019

> **From:** "Maier, Bill"

SCE Officer Admits to Deceiving Public about Nuclear Waste Risks

In a total reversal of roles, Tom Palmisano sides with activists who want to recall HOLTEC canisters

After harsh reprimands for being dishonest in a recent Community Engagement Panel meeting, Palmisano announced his resignation from Edison and vows to make things right. He said, "It suddenly dawned on me that I might be on the wrong side of this situation. Once I started down that road in my mind, I was flooded with guilt and remorse. Too much is at stake to allow this charade to continue. These canisters were never intended for long term storage and I'm afraid we may have even shortened their longevity by gouging them as they get lowered into vaults. We must take this out of the hands of construction workers and enlist the services of the Nuclear Waste Technology Review Board and other top independent scientists who are far more suited for such an endeavor. HOLTEC is not up to the task and is only looking at huge short term profits. I look forward to doing everything I can to rectify this situation by joining forces with the activists who have been right all along".

READ FULL STORY HERE

You have been "pranked", but seriously, if you'd like to see the entire CEP meeting go to this link. Public comments begin at 2:32:30. A lot was said about Tom Palmisano's lies to the public, but I'm afraid it was to no effect. It was fun for a moment to pretend that it did. Big thank you to all who attended. Quite an impressive group with heartfelt testimony worth a listen!

San Clemente Green
Citizens for a Sustainable Future

APRIL 2, 2019

In case of any confusion over my satirical use of "April Fools Day", I'd like to clarify for the record that there was NO MOMENT OF TRUTH for Tom Palmisano and Edison. They still intend to bury the remaining canisters of nuclear waste on the beach at San Onofre, using inferior canisters and inept contractors.

It was an April Fools joke, but also a way to expose the truth, hold Tom Palmisano accountable and highlight a more promising vision for how things should be done. Although I'm sorry to disappoint you, I hope you are even

more motivated to insist on better handling of nuclear waste.
Real solutions begin with wishful thinking, as long as we follow through with action. I could wish for nothing more than an upwelling of honesty and integrity to address many of the issues facing humanity. And a little more love would go a long way too.

Gary
