Subject: Commitment to Submit Integrated Hazardous Materials and Fire/Life Safety Systems Report

Our company formally commits to developing and submitting a comprehensive, integrated report in full accordance with your stated requirements. This report will be prepared, reviewed, and officially stamped by a Georgia-licensed professional engineer whose discipline is relevant to hazardous materials and fire/life safety systems.

The integrated report will include the following components:

1. **Hazardous Materials Review** (related to Maximum Allowable Quantities in Georgia):
 - A complete and up-to-date Hazardous Material Management Plan (HMMP)
 - A detailed Hazardous Material Inventory Statement (HMIS)
2. **Fire and Life Safety Systems Review** (aligned with the associated risk level):
 - Assessment of existing fire suppression systems, including sprinkler and clean agent systems
 - Evaluation of the fire alarm and notification systems
 - Review of occupant egress plans and systems, with verification of compliance with applicable codes and risk assessments

We understand that the final submission must be provided as a single, integrated report and must include the official stamp and signature of the responsible Georgia-licensed professional engineer.
