

Web Development Instructor

Part-time, Remote

Cognitir is a global company offering products in three verticals: training, consulting, and technology.

Training:

We provide in-person web development and data science training courses. We train a wide range of individuals around the world including: business professionals at corporations and consulting firms, finance professionals, entrepreneurs, nonbusiness professionals in politics, medicine, sciences, & law, and university students.

Consulting:

Cognitir offers consulting services that help clients deeply analyze and make sense of their data.

Technology:

We are building machine-learning & data science-based technologies that will help businesses and consumers solve some of their toughest problems.

Cognitir is looking for a web development instructor to join its team. Do you enjoy creating and designing websites? Do you enjoy teaching? If the answer is yes, read on!

BENEFITS

- Ability to teach web development topics at top universities (i.e., London Business School, Columbia Business School, Ohio State University, etc.) and companies around the world
- Opportunity to build expert public speaking, communication, and leadership skills
- Ability to market your academic or professional technical & business projects at universities and corporations
- The chance to work for and impact a fast-growing company that operates on a global scale
- Competitive wages including per seminar bonuses

KEY RESPONSIBILITIES

- Lead Cognitir live, web development courses for university students and professionals. Seminars are held at the university / corporation or at a conference center. Most university seminars are held on weekends while corporate seminars are usually held during the week
- Develop a thorough understanding of our products, markets, and customers and identify new product and market opportunities for Cognitir

REQUIREMENTS

- Excellent communication, public speaking, and organizational skills
- Solid understanding of web technologies including HTML5, CSS, JavaScript, and jQuery
- Experience building professional websites
- Demonstrated attention to detail
- Willingness and ability to travel to seminars (travel costs are covered by Cognitir)
- Authorization to work in the US

BONUS QUALIFICATIONS (NOT REQUIRED):

- Experience completing web development projects in a business environment
- Contributions to open source projects
- Previous teaching and/or tutoring experiences
