

Tennessee Congressional District Delegates Apportionment by Gender

Delegates are earned by each presidential candidate based on the fair reflection of presidential preference in the March 3, 2020 Tennessee Primary. (For more, please see the full section of the TN Delegate Selection Plan at tn dp.org describing this process: III.A.6.Fair Reflection of Presidential Preference – TNDP DSP page 16.)

Delegates at the congressional district level must be gender balanced as closely as mathematically possible in each congressional district, in each district caucus, in each presidential congressional district delegation across the state, and in the full congressional district delegation as a whole.

The following chart represents the allocation of male and female delegates for all candidates earning delegates in all congressional districts, randomly assigned within the bounds of the gender balance rules.

Delegate Apportionment Calculations

To apportion congressional district delegates, the results of the election (vote totals) are compiled for each Tennessee congressional district.

Then for each district:

Candidates with under 15% of the vote do not earn delegates.

Candidates with 15% + are eligible to earn delegates.

Vote share is recalculated using district vote totals to compare the delegates that have 15% and more only to each other.

Delegates are awarded proportionally based on that vote share.
