### **How to dissolve the composition of henna?**

Henna **LEVCHUK Brow Henna** is diluted with distilled water at room temperature until the consistency of soy sauce. ### **How to prepare eyebrows for coloring?**

Before applying the composition, the skin should be degreased. For example, a gentle **Shampoo LEVCHUK Brow Henna** with peeling effect. It also eliminates dead skin particles and opens the hair flakes, facilitating better color penetration.

### **How to keep the layers of henna?**

Henna **LEVCHUK Brow Henna** is applied in several layers. Each layer must necessarily dry. Usually the procedure is sufficient for 10-15 minutes.

### **How can we remove the henna from eyebrows?**

Henna is removed with a cotton pad soaked in warm water. If you want to achieve the effect of the tattoo, use lotion **Clean Clear of LEVCHUK Brow Henna Line** – begin with the roots of the eyebrows, then to arches and tips.
