

2026 Quick Reference Guide

Bright Energy Solutions® Rebate Program

IMPORTANT: See brightenergysolutions.com for details regarding program requirements.

Commercial Refrigeration & Food Service

- Adding retrofit doors to open multi-deck cases
- Commercial dishwashers (ENERGY STAR®, high temp, electric water heating)
- Electric fryers, griddles, steamers, convection ovens, combi-oven, hot-food holding cabinets and induction cooktop (ENERGY STAR)
- Electronically commutated motors (ECMs) in various equipment
- Glass door reach-in cases replacing open multi-deck units
- Ice machines (ENERGY STAR)
- Kitchen hood with temp or optical sensors and VFDs
- LED reach-in refrigerated case lighting (retrofit only) and occupancy sensors
- Low-heat reach-in freezer doors
- No-heat reach-in cooler and freezer doors
- Q-Sync PMS evaporator motors in walk-in or reach-in coolers and freezers
- Strip curtains in refrigerated warehouses, and walk-in coolers and freezers

Compressed Air Systems

- Adding storage
- Compressed-air leak survey
- Cycling refrigerated dryers
- Dew-point demand controls
- Engineered compressed-air nozzles
- Low-pressure blowers
- Mist eliminators
- No-loss air drains
- Pressure flow controllers
- Variable-frequency drive (VFD) compressors

Heating and Cooling – Commercial & Industrial

- Air-source heat pumps — split systems, single packaged systems, single packaged vertical HP
- Central air-conditioning — split systems, single packaged systems, single packaged vertical AC
- Chillers — air-cooled and water-cooled
- Demand-controlled ventilation (CO₂ sensors)
- ECM in fan powered boxes and domestic hot water and cooling water circulators
- Energy-recovery ventilators
- Ground-source heat pumps
- Heat-pump water heaters
- High-efficiency natural gas furnaces and water heaters
- High volume low speed fans
- Mini-split ductless air conditioners and heat pumps
- Packaged terminal units (PTAC and PTHP) and guest room energy management systems
- Quality Installation (small split system and ASHPs)
- Switched reluctance motors for HVAC supply fans
- Variable refrigerant flow multi-split air-cooled heat pumps
- Window and wall air conditioners (ENERGY STAR)

Custom Incentives

- Incentives for energy-saving measures not covered by other BES programs. **Preapproval required.**

Electric Forklifts and Tow Tractors

- Class 1, Class 2, or Class 6 replacing internal combustion unit, or addition to fleet.
- Forklift lithium-ion batteries (24-hr facility, 5 days per week or more)

Infrared Curing and Drying

- **Preapproval is required**

Lighting – Retrofits

- Contractor incentive for lighting retrofit installations
- LED exit signs
- LED high-bays, low-bays, troffers and 4-foot linear lamps and u-tubes
- LED indoor grow lights replacing HID
- LED pin-based replacement lamps
- LED refrigerated case lighting & occupancy sensors
- LED recessed downlight fixtures or retrofit kits
- Occupancy and daylighting sensors
- Networked lighting controls

Lighting – New Construction

- LED indoor grow lights (DLC-listed)
- LED high-bay and low-bay fixtures (DLC-listed)
- LED troffers (DLC-listed)
- LED indoor recessed downlight fixtures (ENERGY STAR)
- LED pin-base lamps (ENERGY STAR)
- LED linear lamps and u-tubes (DLC-listed)
- Lighting watts per square foot as compared to code
- Networked Lighting Controls (DLC-listed)
- Occupancy sensors in LED refrigerated case lighting

New Construction Design Review

- No-cost design review, energy recommendations and potential custom rebates for new facilities. Contact your utility early in the design stage to qualify.

Pumps & VFDs

- High-efficiency pumps
- Variable-frequency drives (VFDs) on HVAC pumps and fans, and process pumps

Residential Incentives

- ChargePoint® Home charger or other Level 2 charger
- ENERGY STAR appliances & LED lighting
- Heating & cooling equipment

IMPORTANT: See brightenergysolutions.com for details regarding program requirements.
