

Bring Home the Savings!

Up to \$500 in Rebates!

Ready to **charge up** at home? Skip the trip to the public charger and enjoy the convenience of charging your electric vehicle (EV) at home. With our EV charger rebate program, our incentives make home charging more affordable, helping you save now on installation costs and continue saving every mile you drive.

Install a Level 2 charger — the type that uses a 240-volt outlet to charge your vehicle much faster than a standard household plug — and receive a **\$500 rebate** on a qualifying ChargePoint Home Flex charger or a **\$150 rebate** on other qualifying Level 2 chargers.

Choose the charger that fits your EV needs and save.
