Raven Marine Lightering System

Hand-held display of COG, SOG, HDG and Closing Rate for "ship-to-be-lightered" and "lighter"

Highlights

- Highly reliable Bluetooth Pilot Interface (BPI for AIS data)
- Wi-Fi communications from the laptop to the iPod Touch PDA for added range
- COG, SOG and Heading displayed on the PDA for both the "ship-to-be-lightered" and the "lighter" ship
- Closing rate between the two vessels is displayed on the PDA

Raven Wheelhouse II Software

- Developed by Raven over the past 15 years with the help of ship pilots
- User-configurable layering of chart data (S57, channel centerlines, etc.)
- Online chart updates
- Manual or automatic intercept calculations
- Works with Raven Wheelhouse PDA on Apple iPhone or iPod Touch
