

Workboat Operators

Raven Marine Workboat System

All inclusive sub-meter position accuracy, AIS data, chart updates with redundancy

Highlights

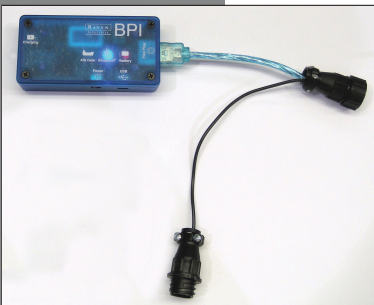

- Highly reliable Bluetooth-connected, beacon-corrected DGPS receiver
- Highly reliable Bluetooth Pilot Interface (BPI) for AIS data
- High-quality, on-site support and training
- Access to real-time weather, ports data and convenient chart updating via a 3G mobile broadband Internet connection

Redundant System

The redundant system contains two independent systems, one in the upper wheelhouse and one in the lower wheelhouse.

UPPER & LOWER WHEELHOUSE

- Semi-rugged laptop computer with a large, sunlight-viewable touch screen
- Raven 210L Bluetooth DGPS receiver, beacon-corrected
- Raven BPI (Bluetooth Pilot Interface) for getting AIS data
- Raven AisClient and SendClient software modules
- Charting program with RNC, ENC and DNC charts
