

Raven Marine Service Bulletin

Title: WhPDA Page Does Not Load after Apple Update

Software Versions Affected

Apple Ipad Touch / Iphone software version 3.0 and newer

Hardware

All Iphone / Ipad Touch devices

Problem Description

The network connects properly however when trying to access 192.168.10.100 the page does not load / show. To see what version of software your Iphone or Ipad Touch is using go to Settings -> General -> About and see the "Version" field.

Fix

In addition to the IP Address and Subnet Mask fields enter the laptops IP address for the **Router** and **DNS** fields. See screen capture below as an example for a laptop with a 10.100 IP address.
