Album Scanner App Photomyne Reaches 1M Users, Releases Major Update

iOS album scanner app Photomyne has announced it crossed the 1M users and 15M scanned photos thresholds, and unveiled version 4.0 which offers cloud-only backup feature and major updates to its scanning technology.

Tel Aviv, July 2016 - Photomyne, the photo app that invites users to quickly scan entire photo albums, save and share them with friends and family, has announced it reached the 1 million users and 15 million scanned photos thresholds. In addition, the company announced the release of version 4.0, which brings significant enhancements to the Photomyne app.

The new app update will offer the app's audience of over **1 million users** a revamped, machine-learning based scanning algorithm for faster and more efficient scanning process. In addition, Photomyne Cloud subscribers will now benefit from a new cloud-only photo backup option. The latter will allow heavy users with large scanned photo collections to free up space on their iOS device while still keeping their Photomyne photos backed-up on the cloud and readily accessible.

"We've seen a much faster than expected growth in our user base this past year," said Photomyne CEO Nir Tzemah. "This can only be seen as proof that Photomyne answers a real need of preserving one's personal history and memories." Tzemah also stated that "with the release of version 4.0 we hope to make the Photomyne experience even better than before." The Photomyne app was first launched a year ago, in July 2015.

Photomyne has been the subject of extensive media coverage in the past few months, from globally acclaimed publications such as TechCrunch,

[PetaPixel](#) and [Popular Photography](#). TechCrunch (Sarah Perez) stated (May 27, 2016): "*What makes Photomyne compelling versus the competition in this space is a combination of its technology and the user experience.*"

About Photomyne
Rediscover precious memories of the past and save them forever, right on your phone. Scan paper photos, back them up and share them with friends and family. *Join 1M users who already scanned more than 15M memories with Photomyne*.
