

WARLOCK 22

The Warlock™ 22 has an exceptional weight-to-strength ratio, and is the lightest .22LR suppressor on the market. Due to the notoriously harsh nature of rimfire ammunition, this product features CTA™ (Click Together Assembly) baffles to ensure the suppressor remains easy to clean - even after long days at the range. Thanks to its high-strength baffle design and lightweight aluminum construction, the Warlock weighs only 3oz and reduces sound to 114.6 dB, proving that big results can come from small packages.

KEY PERFORMANCE FEATURES:

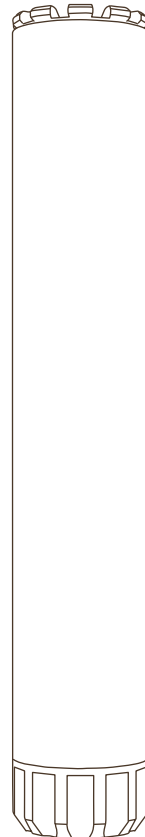

Lightest .22LR suppressor available at only 3oz

Features CTA™ baffles for durability and ease of maintenance

Reduces sound to 114.6 dB at the muzzle

Cleaning recommended after 1,000 rounds

Compatible with both pistol and rifle .22LR hosts
