## ATRO Launches Torque-Rod.com

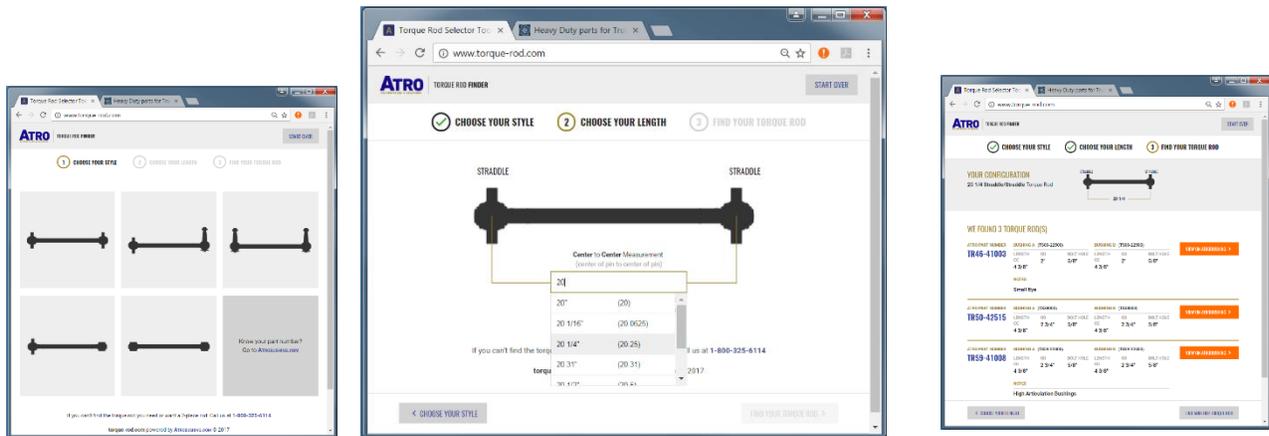

*Torque Rods identification made simple and fast!*

**St. Clair, MO** – ATRO Polyurethane•Solutions announces a new micro-site designed to help heavy-duty truck mechanics, fleet owners and parts distributors identify and confirm the proper replacement torque rods and bushings.

The Torque Rod Finder, designed by ATRO, is available at Torque-Rod.com. With as few as three clicks, customers can identify and select the proper parts from a comprehensive database of torque rods. Torque Rod Finder will save time by confirming the correct replacement part, improving customer service and ultimately getting trucks back on the road faster.

“ATRO Polyurethane•Solutions sees Torque-rod.com as a solution,” said Mark Sturmon, President & Owner of ATRO Engineered Systems. “We believe in saving our customers time, whether it’s less downtime due to our exclusive ATRO POLYS or assisting our customers and distributors in finding the right part faster.”

The time-consuming task of cross-referencing complex charts to find the right torque rod and bushings is over. ATRO’s Torque Rod Finder tool makes VIN-less parts identification easy and fast. Users simply select the bushing type and input the center-to-center measurement. Whether straddle, tapered or hollow bushings, or torque rod lengths 14 to 26 inches, *Torque-Rod.com* will locate the necessary rod.

### About ATRO Polyurethane•Solutions

ATRO is a recognized U.S. and worldwide leader in superior suspension parts for trucks, trailers, buses, and agricultural and military vehicles and equipment. ATRO Polyurethane•Solutions designs and engineers specific to the application, outperforming and outlasting OE rubber and other polyurethane manufacturers’ parts by utilizing 11 proprietary formulas, ATRO POLYS. ATRO’s product line extends beyond bushings, suspensions and torque rods, and includes polyurethane solutions bumper to bumper for trucks and trailers. ATRO, located in St. Clair, MO U.S.A., was founded in 1987 and is family-owned. The company’s website is ATROBUSHING.COM.
