5. Considerations and Known Limitations
6. Compatibility of this Integration Product version with Partner's and/or other Third Party Hardware's Products
7. Compatibility of this Integration Product version with Partner's and/or other Third Party Software's Products
8. Features Comparison
9. Impacts on other Products/Features

### 1. New Features and Enhancements

- No changes from 1.2.8.0

### 2. Problems Addressed

- The installer now allows a different installation location.
- The installer now installs all required files if either option is chosen.

### 3. Installation Considerations

- Installer requires uninstall of any previous version before install. Please backup Aiphone tables in ACVS Core. Tables are not removed during uninstall.

### 4. Upgrading Paths

- Installer requires uninstall of any previous version before install. Please backup Aiphone tables in ACVS Core. Tables are not removed during uninstall.

### 5. Considerations and Known Limitations

- IX-MV stations can release the door and then reject an incoming call. This leaves it in a state of "Door Release Indication". Aiphone recommends users answer calls and then release, and then hang-up.
- Station numbers should start with 1-9, not 0's

### 6. Compatibility of this Integration Product with Partner's and/or Third-Party Hardware's Products

**Table 1: Partner's Hardware and/or other Third-Party Hardware**

Equipment Type	Vendor	Model	Latest Supported Version
----------------	--------	-------	--------------------------
