7. Compatibility of this Integration Product version with Partner's and/or other Third-Party Software's Products
8. Features Comparison
9. Impacts on other Products/Features

1. New Features and Enhancements

- Added support for the IX-EA and IX-DVM

2. Problems Addressed

- The installer now allows station numbers with preceding zeros.
- Station numbers are now considered strings instead of integers.

3. Installation Considerations

- Installer requires uninstall of any previous version before install. Please backup Aiphone tables in ACVS Core. Tables are not removed during uninstall.

4. Upgrading Paths

- Installer requires uninstall of any previous version before install. Please backup Aiphone tables in ACVS Core. Tables are not removed during uninstall.
- Installer will check for existing tables during install and modify Station numbers from integer type to string type.

5. Considerations and Known Limitations

- **IX-MV stations can release the door and then reject an incoming call. This leaves it in a state of "Door Release Indication". Aiphone recommends users answer calls and then release, and then hang-up.**

6. Compatibility of this Integration Product with Partner's and/or Third-Party Hardware's Products

Table 1: Partner's Hardware and/or other Third-Party Hardware

Equipment Type	Vendor	Model	Latest Supported Version
----------------	--------	-------	--------------------------
