

Customer Value Proposition: **Bosch Video & Intrusion - C-CURE 9000 Integration**

April 23, 2024

Version 3.7

The power behind **your** mission

Customer Value Proposition: Bosch Video & Intrusion + C·CURE 9000 Integration

Segmentation	Bosch Security Systems <div>Enabling intelligent security solutions globally across multiple vertical applications : City Surveillance/Smart Cities/Crime Centers, Intelligent transportation (traffic: intersections & highway, LPR, parking), Airports, Higher & Lower Education, Fed & Local Government, Data Centers, Retail, Healthcare, Hospitality.</div>									
Value	Together, Bosch & Software House offer fully integrated video and intrusion solutions within CCURE 9000. This collaboration combines the reliability and advanced analytics of Bosch's technology with the sophisticated functionality of CCURE 9000, creating robust and intelligent security solutions. Trusted in the most sensitive environments, our integrated approach ensures performance and resiliency safeguarding your assets.									
Value Drivers	Video Surveillance		Video Quality & Intelligence		Data Security		Intrusion Detection		Unified Solution	
	<i>Provides advanced, seamless integration with the VRM based Bosch recorders.</i>		<i>Key Bosch quality and advanced intelligence capabilities enabled.</i>		<i>Securing video surveillance data.</i>		<i>Reliable Intrusion alarm solution.</i>		<i>One-stop integrated solution for both video and intrusion system.</i>	
Enables	<ul style="list-style-type: none">• Import cameras into C•CURE• Realtime and recorded video• Realtime status and event monitoring including analytic events• Supports panoramic cameras• Supports Video control such PTZ, Presets operations• Configure Triggers and execute actions		<ul style="list-style-type: none">• Highest Image Quality• Intelligent Streaming achieving most efficient bit rate• Video Analytics• Intelligent Autoexposure and dynamic Noise reduction		<ul style="list-style-type: none">• Effective Password enforcement• Secured connections (https)• Insecure ports closed• Embedded login firewall		<ul style="list-style-type: none">• Import Panel entities into C•CURE• Send command to panel and entities• Real time status and event monitoring• Configure triggers and execute actions		<ul style="list-style-type: none">• Ease of installation, configuration and management• Supports CCURE 9000 Enterprise system• Expert service and support	
Features	C•CURE 9000 integration using C•CURE SDK	Bosch video and intrusion integration with C•CURE 9000 integrated access control system	Wide product catalog and a seamless integration	Reliable Video Surveillance, highly accurate analytics paired with Intrusion Alarm systems	Simultaneous live and recorder video sessions	Realtime Status Monitoring	Multi recorder/panel support and scalability	Suppress & eliminate false alarms	Efficient Recording solution	Ease of use
