## Video Security

The Bosch Integration plugin provides advanced, seamless integration with the VRM-based Bosch recorders, hybrid, analog DVR, and Bosch recorders. Features include: monitor and control your surveillance cameras, display video views, video tours, control PTZs, replay videos, generate user alarms, configure triggers/actions, execute actions and real-time status and event monitoring.

## Intrusion Detection

The Bosch Integration plugin provides advanced, seamless integration with the Bosch B/G Panels. Features include: add Bosch panel to C•CURE 9000 system, multi panel support, import panel entities (areas, doors, points, outputs), send panel commands, configure triggers/actions, execute actions and real time status and event monitoring.
