7. Compatibility of this Integration Product version with Partner's and/or other Third Party Software's Products
8. Features Comparison
9. Impacts on other Products/Features

1.New Features and Enhancements

Added new service build/installer for v. 2.9x to accommodate changes in CCURE 9000 system. **Recompile NetworkHarbor.NextGetConnectedProgram.Server.AccessControl.exe with version set to 2.9.x**

2. Problems Addressed

3. Installation Considerations

Version Information:

The NetworkHarbor.NextGenConnectedProgram.Server.AccessControl.exe (which is loaded by the Framework Component Server and visible in the Server Management Application) is v. 2.9.x

This version of the NHI CCure 9000 Server Component supports CCURE 9000 v. 2.9.x

4. Upgrading Paths

IMPORTANT NOTE: Due to directory structure changes made by Software House, if you are upgrading from a C•CURE 9000 version 1.9x or 2.0x to 2.1x or later, you **MUST** manually uninstall any previous version of the NHI C•CURE 9000 Server Component **BEFORE** you upgrade the Software House C•CURE 9000 system software. Failure to do so may result in not being able to uninstall the previous version of the NHI C•CURE 9000 Server Component or installing a new version compatible with the C•CURE 9000 version 2.9x system.

5. Considerations and Known Limitations

6. Compatibility of this Integration Product with Partner's and/or Third-Party Hardware's Products

Table 1: Partner's Hardware and/or other Third-Party Hardware
