

victor AMAG Symmetry Integration

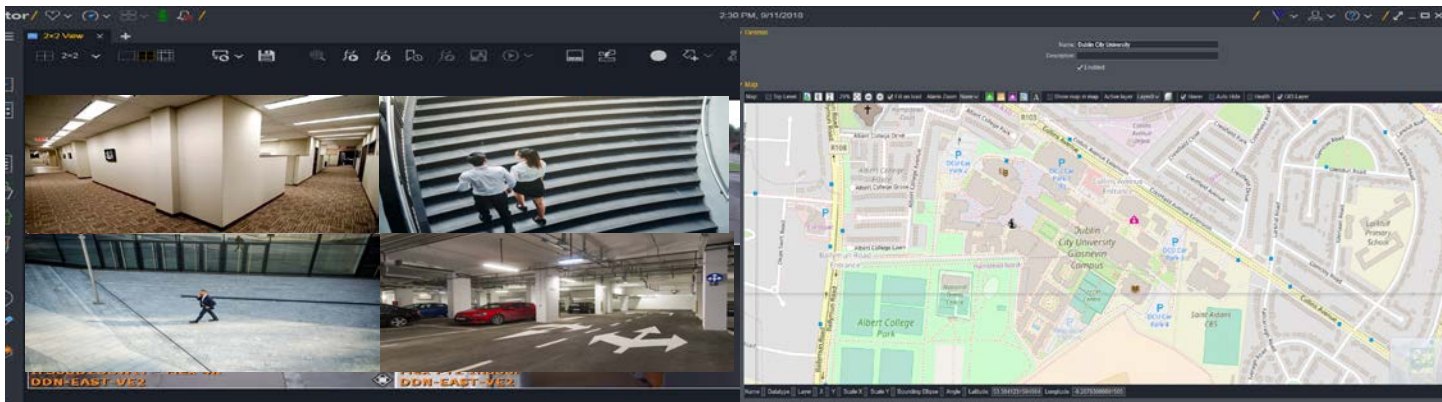

The victor AMAG Symmetry Integration driver provides a powerful, flexible and easy to use Graphical User Interface (GUI) for managing your AMAG Symmetry infrastructure through victor client from American Dynamics.

Features of the Integration

- Support for multiple AMAG Symmetry servers.
- Supports Swipe and Show for AMAG Symmetry card swipes within victor.
- Lock and unlock doors connected to AMAG Symmetry within victor.
- All server activities are logged in the security journal, allowing alarms to be reviewed together in future investigative reporting.
- Supports alarms from AMAG Symmetry Access Control systems.
- Create, Edit or Delete AMAG Symmetry objects within victor.
- Create, Edit or Alarm Point objects within victor.
- AMAG Symmetry objects under Device List.
- AMAG Symmetry objects under Sites list.
- AMAG Symmetry objects and annunciation on Maps.
- Supports importing AMAG Symmetry readers, outputs, monitor points, nodes, doors, floors, and intrusion areas.
- Supports importing AMAG Symmetry personal information.
- Alerts for AMAG Symmetry objects.
- Object Association for AMAG Symmetry sensors.
- Activate and Deactivate manual actions on AMAG Symmetry Sensors.
- AMAG Symmetry object supported in Find in Journal and Find on Map.
- Installation available on victor Remote Clients.
- View card swipes in a Transaction Display.
- Filter incoming AMAG Symmetry alarms from victor.

AMAG Commands are commands issued by victor to AMAG objects. These include Server Commands, Reader Commands, Monitor Point Commands, Auxiliary Output Commands, and Node Commands.

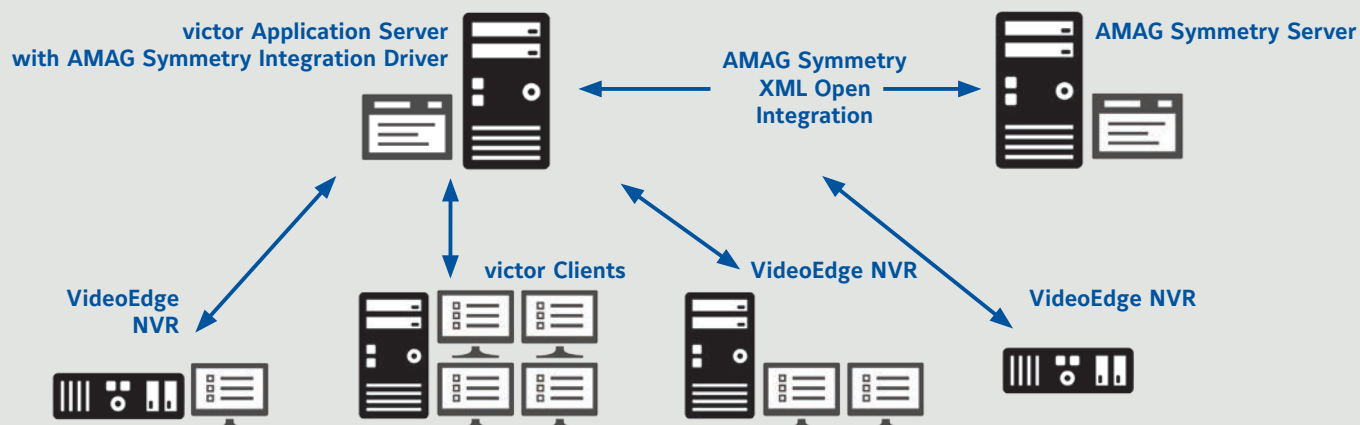

The victor Application Server provides seamless integration with the AMAG access control system. The customer can view all critical security alarms in one station on one screen.
