

Commend Intercom integration for victor v5.2

Release Notes

8200-1147-1133

Document Version: B0

March 2021

This document provides important information regarding the Commend Intercom integration for victor. In case of any discrepancy, the information below supersedes the information in any document referenced herein. Read this file before installing the product.

Product: Commend Intercom integration for victor

- Integration software version: 4.1.87.0

This driver release is qualified with victor when installed on the following systems:

- victor Unified systems: v3.70 (C-CURE v2.70 and victor v5.2)

Overview

Commend Intercom systems can interconnect with victor Unified Client's access control system through a digital connection over the Internet. The use of the IP network with the integration not only allows voice communication between Commend stations, but also takes on increasingly complex control and reporting tasks in victor.
