

victor Lenel Integration

The integration of Lenel OnGuard with victor VMS provides a single easy to use Graphical User Interface (GUI) for managing, responding and controlling your access control infrastructure through the victor client from American Dynamics.

American Dynamics victor VMS is a globally scalable solution optimized for command and control that seamlessly synchronizes video surveillance with access control, fire, intrusion and other systems into one powerful, intuitive interface. This integration has received Lenel factory certification and is part of the Lenel OpenAccess Alliance Program (OAAP).

Features of the Integration

- Monitor and acknowledge OnGuard Access Control System events and alarms from within victor VMS
- View video cameras or groups of cameras associated with a door
- Operators can view current state of doors (open, closed, locked, unlocked)
- Operators can lock and unlock doors connected to the OnGuard system from victor clients
- Users can acknowledge the OnGuard events from victor clients
- Events from OnGuard can be used to trigger other actions in victor, such as video call-ups and PTZ preset calls
- Arm, disarm, and silence area alarms
- OnGuard access control activities are logged in the security journal, allowing both access and video events to be searched and reviewed together for easy investigation
- Create, Edit and Delete OnGuard objects
- Supports multiple OnGuard servers
