

Math in Art, Technology, and History

David Pea

Redmond Hig

Redmond

Dear Math Friends,

In my original power point, I've included many colorful slides of student work from units in the class as well as curious pictures of fractals, tessellations, math art, and more. But since I'm limited in the size of the file I can upload to NCTM, I've had to take out almost all of the color to make it fit. This is not the powerpoint you will see at my presentation.

Please check out

www.thepeabodychronicles.com for a comprehensive collection of M.A.T.H. activities, resources and student work, or e-mail me at davidmpeabody@gmail.com for questions or to collaborate on future projects.

Peace and Math,

David Peabody
