

## Number Talk/String Planning Page

<b>Intended Learning Target</b> What strategy are you hoping will emerge?		<b>Problem(s)</b>	
<b>Anticipated Thinking</b> What are different ways that students will approach the problems? What strategies will they use?			
<b>Recording Thinking</b> What visuals will support sense making, clarify student thinking? How might color be helpful? What recording choices will help to highlight the intended learning target?			
<b>Consider:</b> Open number line, area/array model, base-10 drawings, number bonds...			
<b>Questioning/Connecting</b> What questions will help students make connections among strategies, representations?
