BKK16-401: Enhancing Application Performance with ODP

Presented by
LNG ODP Development Team

Date
BKK16-401 March 10, 2016

Event
BKK16-401
Abstract

This session is a roundtable discussion describing experiences with using ODP with OpenFastPath, NGiNX, TRex, as well as the creation of a simple native firewall application. This discussion will be interactive and audience participation is encouraged.

All of the applications discussed here will be part of the afternoon LNG demo sessions.
