Bootstrapping a SQUAD community

Antonio Terceiro

Agenda

- About SQUAD
- Recent/current work & plans
- Open discussion

About SQUAD

- 2 years olds project
 - First commit: May 2016
- Powering qa-reports.linaro.org
- Written in Python
- Uses Django
- Repository at Github: [Linaro/squad](https://github.com/Linaro/squad)
- More complete introduction:
[SFO17-214 SQUAD: an overview of the platform behind qa-reports.linaro.org](#)

Recent/current work & plans

Recent/current work

- Tracking and displaying regressions and fixed
- Support for known issues
- Performance improvements

Plans

- Improving metrics support
 - Add units
 - Higher is better/lower is better
 - Better plots
 - Thresholds for detecting regressions
 - API to get data
- LAVA callbacks
- Configuration API

Open discussion

We would love to receive feedback from both users and people running their own SQUAD instances
