## Animal Adventure

### Directions:

Pick a character from the worksheets you have worked on this week (Bobby, Franky, or Pixie). Then Choose another animal character that you know well. This can be a fairy tale animal or an animal character or from a different story you have read. Compare and contrast the two characters. Write the name of each character on the lines above each circle. Remember, the section where the circles overlap are is where to list what both characters have in common.

A Venn diagram consisting of two overlapping circles. Above each circle is a horizontal line for writing the character names. The circles are divided into three sections: the left circle, the right circle, and the overlapping center. Each section contains ten horizontal lines for writing.
