

Name: _____ Date: _____

Use a Multiplication Strategy!

Use what you know about multiplication strategies to answer the questions.

Find the product of each multiplication sentence using the given strategy.

Example: Solve this question using a number line.

$$\begin{array}{r} \times 6 \\ 10 \\ \hline 60 \end{array}$$

1. Solve this question using an array.

$7 \times 7 = \square$

2. Solve this question using skip counting.

$$\begin{array}{r} \times 9 \\ 10 \\ \hline \square \end{array}$$

3. Solve this question using a multiplication table.

$7 \times 9 =$

X	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

4. Solve this question using repeated addition.

$$\begin{array}{r} \times 9 \\ 8 \\ \hline \square \end{array}$$

___ + ___ + ___ + ___ + ___ + ___ + ___ + ___ + ___ + ___ = ___

5. Solve this question using a number line.

$$10 \times 8 = \square$$

6. Solve this question by drawing a picture.

$$\begin{array}{r} \times 8 \\ 6 \\ \hline \square \end{array}$$
