

Name: _____ Date: _____

Read, Choose, Multiply!

Use what you know about multiplication strategies to solve problems.

Read each problem. Find the important information. Choose a strategy to solve the problem. Write the answer on the line with the label word.

Example:

The third grade students helped 6 groups of 3 dogs. How many dogs did they help in all?

$$6 \times 3 = ?$$

Choose one to solve the problem

18 dogs

1. The third grade students helped 5 groups of 4 cats. How many cats did they help in all?

$$5 \times 4 = ?$$

2. The third grade students helped 6 groups of 6 dogs. How many dogs did they help in total?

$$6 \times 6 = ?$$

3. The third grade students helped 7 groups of 5 cats. How many cats did they help in all?

$$7 \times 5 = ?$$

4. The third grade students helped 6 groups of 7 dogs. How many dogs did they help in total?

$$6 \times 7 = ?$$

Now check your work! Use the multiplication chart to check your answers.

X	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100
