# Drawing Angles

Use what you know about angles to draw some angles on your own!

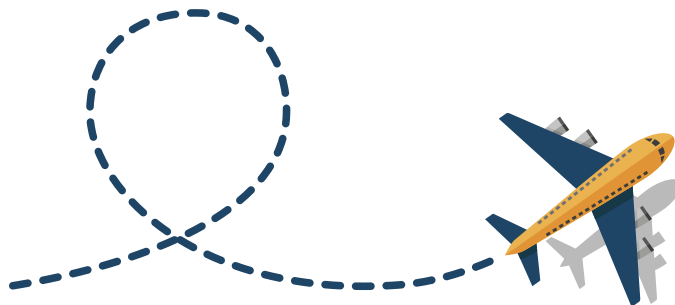

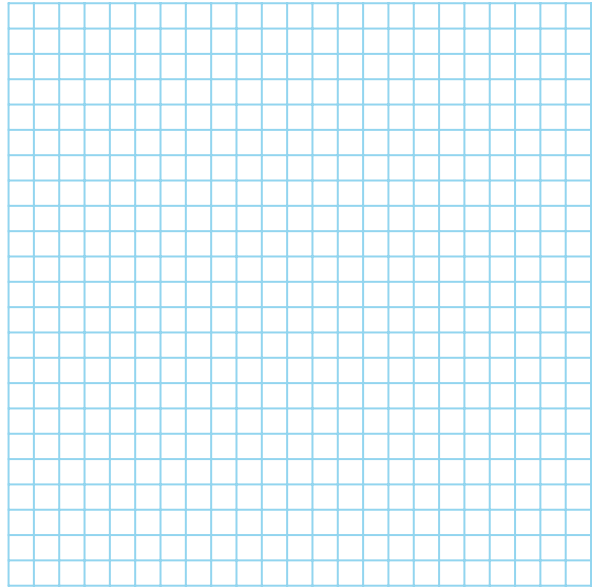

Read the directions for each box. Use the grids to draw the angles, shape, or picture.

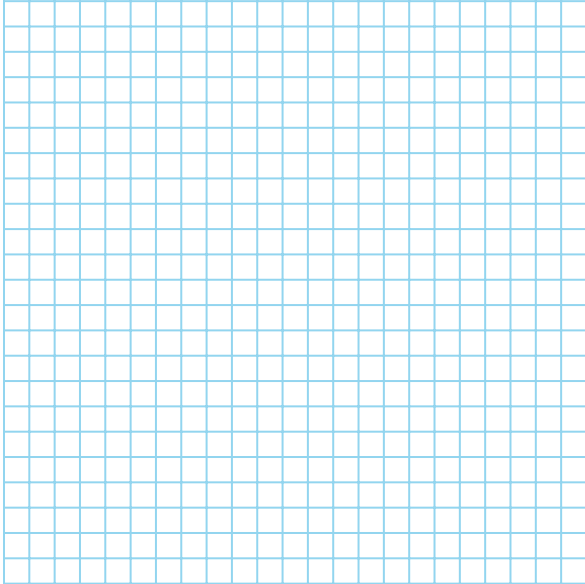

1. In the workspace, draw a right angle. Label the angle.

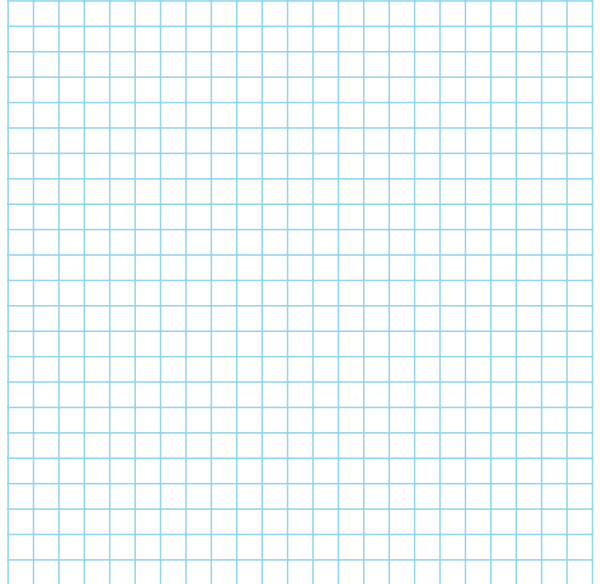

2. In the workspace, draw an acute angle. Label the angle.

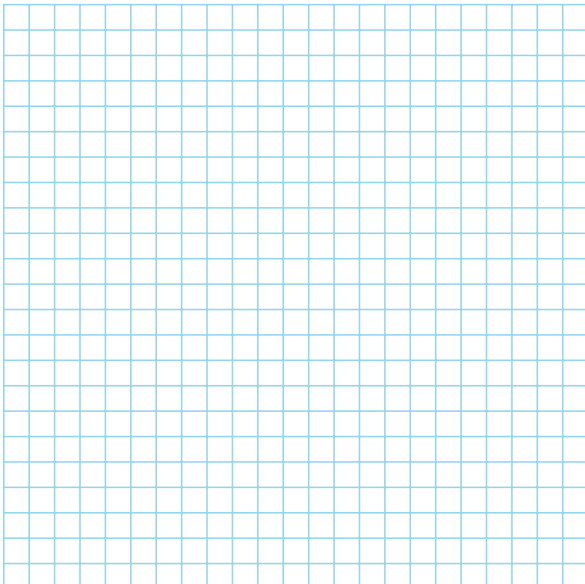

3. In the workspace, draw an obtuse angle. Label the angle.

4. In the workspace below, draw a shape with four right angles. Label the shape.

5. In the workspace below, draw a shape that has at least two different angles. Label the angles.

6. In the workspace below, draw a shape that has at least three different kinds of angles. Label the angles.
