

Student Name: _____

Practice Checking Your Division Problems

Directions: Use multiplication to check each of the answers to the following problems, to see if they are correct. If the quotient is correct, write "correct" on the line. If it is not, then do the division problem and find the correct quotient. Show all of your work.

1)
$$\begin{array}{r} 89 \text{ R}1 \\ 7 \overline{)624} \end{array}$$

2)
$$\begin{array}{r} 25 \text{ R}3 \\ 6 \overline{)1234} \end{array}$$

3)
$$\begin{array}{r} 121 \\ 9 \overline{)1092} \end{array}$$

4)
$$\begin{array}{r} 123 \\ 5 \overline{)615} \end{array}$$

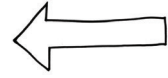

Be sure to check all of your answers and look for mistakes!

Practice Checking Your Division Problems

Directions: Use multiplication to check each of the answers to the following problems, to see if they are correct. If the quotient is correct, write "correct" on the line. If it is not, then do the division problem and find the correct quotient. Show all of your work.

5)
$$\begin{array}{r} 987 \\ 3 \overline{)2961} \end{array}$$

6)
$$\begin{array}{r} 699 \text{ R}5 \\ 8 \overline{)5599} \end{array}$$

Be sure to check all of your answers and look for mistakes!
