## Partial Quotient Practice

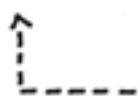

**Directions:** Use the idea of partial quotients to solve each of the division problems below. You can use the powers of 10 or grouping, whichever makes the problem go faster.

---

1)  $1085 \div 7$       2)  $7104 \div 32$       3)  $2244 \div 51$

4)  $1584 \div 12$       5)  $1467 \div 9$       6)  $2830 \div 28$

7)  $9090 \div 45$       8)  $7000 \div 62$       9)  $1150 \div 15$

 Be sure to check your answers and look for mistakes!
