## Number Line Addition Game

### DIRECTIONS:

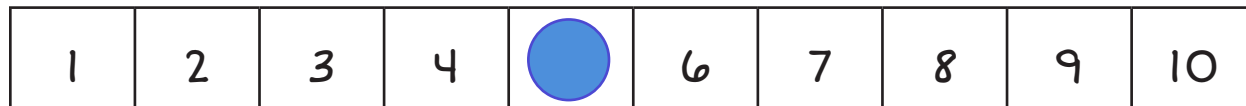

You will need a number line, a game pawn, and a number die.

1. Roll the die and place your game pawn on the number rolled.
2. Roll the die again and add the number you rolled to the number you are on.
3. Write down the addition sentence you made.
4. Repeat the steps until you have filled in all the problems on your recording sheet.
5. Circle the problems that equal 10 on your recording sheet.
6. If you are playing against someone the person with the most additions sentences that equal 10 wins the game.

### Sample Play:

You rolled a 5 so you put your game marker on the 5.

You rolled a 4 so now you move your game marker 4 spaces.

Now on your recording sheet you write the addition problem you made:  $5+4=9$

Print the number line game board below.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----
