

SCIENCE

Earth Science Professions Assignment

1) Research each of the following earth science professions. Then, write a brief description of each listed below.

a) Geologist

b) Hydrologist

c) Hydrogeologist

d) Geochemist

e) Paleontologist

f) seismologist

2) Choose a career in earth science, and create a job advertisement for it. You may choose from the list above, or research one of your own. Include the answers to the following questions in your advertisement:

- a) What is the name of the job?
- b) What are the duties to perform?
- c) Will it require working closely with others, somewhat with others, or alone?
- d) Which type of working environment (office, lab, field work, mixture of locations) is it?
- e) Will this job require travel? If so, to where? How often?
- f) What is the pay?
- g) What type of education is required?
- h) How much experience is required?
- i) Which special skills must one have?
