

Student Name:

**Investigating Other STIs**

**Part A (40 points)**

Using reliable, current online or print sources, fill in the table below with information about sexually transmitted infections that are not caused by bacteria or viruses.

	Trichomonas Vaginalis	Yeast Infections	Pubic Lice	Scabies
Organism that causes it				
Symptoms				
Diagnosed by				
Treatment				
Prevention				

Student Name:

## Investigating Other STIs

### Part B (60 points)

Create a short, informative slide presentation for your classmates about one of the STIs you investigated in Part A. First, brainstorm concerns and questions that your audience is likely to have about the STI, and use them to guide additional research as needed. Then, write a draft of your presentation, noting places where photographs, illustrations, or charts might communicate information better than text or might add visual interest. Finally, create a final draft of your presentation to share with your classmates.
