Video Study Guide: Finding Interior Angles with Algebraic Expressions

1. Solve for x and then determine the angle measurements for $\angle A$, $\angle B$, and $\angle C$.

2. In a right triangle, two interior angle measurements are $(33 - x)^\circ$ and $(5x - 3)^\circ$, as shown below. Solve for x . What are the interior angle measurements of this triangle?

3. Solve for x . What are the interior angle measurements for this triangle?
