

CENTENNIAL PARK VETERINARY PRACTICE

VETERINARY EXAMINATION

At the request of Prime Thoroughbreds, a veterinary examination of Lot 978, as described in the sale catalogue, at Magic Millions Gold Coast Weanling Sale 2020, **Russian Revolution ex The King's Widow**, a brown weanling filly was examined with regard to purchase for syndication on Thursday 30th July 2020.

Clinical Examination:

This filly was presented in good condition; she was a well-conformed filly, this filly was a quality individual with plenty of scope. Upon examination in hand, all clinical parameters were found to be within normal limits, and all flexion tests were normal. There were no abnormalities noted

Ophthalmic Examination:

This examination determined that the horses eyes were normal.

Radiographic Examination:

Radiographs submitted to the sales repository for this horse were examined and found to have no significant findings. The horse was considered a low risk.

Auscultation of Thorax:

The horse has a normal and regular heart rhythm at rest. The horse has normal lungs sounds and normal respiratory rate at rest.

Endoscopic Examination:

Endoscopic examination of the upper respiratory tract is not performed on weanlings.

Conclusion:

In my opinion, at the time of this examination the 2019 brown weanling filly by **Russian Revolution ex The King's Widow** in so far as can be determined from the examination conducted, is suitable for syndication and all risk mortality insurance cover.

Yours faithfully,

Dr TMB Roberts BVSc. MRCVS
