15<sup>th</sup> November 2019

### Veterinary Certificate

#### **Tattersalls Newmarket Autumn Horses in Training Sale 2019 Lot :673 Cristal Breeze 3 y.o bay gelding**

On the 28<sup>th</sup> October I examined the horse described above at the Tattersalls, Newmarket, United Kingdom sales complex, at the request of Australian Bloodstock.

**Findings :** The gelding was found to be in good general condition and health and passed a full clinical examination. In my opinion following the clinical exam, evaluation of the upper respiratory tract endoscope and radiographic series the horse is considered suitable for syndication as a racehorse.

*This certificate has been prepared for inclusion in the disclosure statement by the Horse Syndicate and at the time of examination could be relied upon as a true document.*

*The issuing veterinarian has no financial or other interest in the Horse Syndicate or monies raised from the syndication.*

Yours truly,

Dr Darren P Arnold BSc BVMS MRCVS  
B&W Equine Vets
