On the 1st of March, 2021, at the request of Nathan Bennett and Philip Wells of Bennett Racing, I examined Lot 384 as described above at the Inglis Sales Complex at Oaklands Junction. At the time of examination the horse was found to be in good condition with a good girth and hindquarter. At the time of and within the limitations of this on site examination, the horse was not lame at the walk.

No abnormalities were detected on limited clinical examination:

- Heart – No abnormalities detected on limited auscultation
- Eyes – No abnormalities detected on limited examination
- No swelling or effusion of joints detected
- Normal dental occlusion
- Two descended testicles

Nothing was found during this examination that would, in my opinion, make this colt unsuitable for mortality insurance.

I do not have any financial or other interests in the syndication or partnership or the monies to be raised from the syndication. This certificate has been prepared for inclusion in the disclosure statement for the syndication or partnership.

The findings of this examination are valid only for the day of the examination and for the persons requesting the examination, Nathan Bennett and Philip Wells of Bennett Racing.
