VETERINARY PRACTICE

VETERINARY EXAMINATION

At the request of Prime Thoroughbreds, a pre-sale veterinary examination of the brown yearling filly **Lot 565 by Headwater ex Deodara** as described in the 2021 Classic Sales Catalogue was carried out at the William Inglis Yearling Sale Complex, Warwick Farm, NSW on the 9th February 2021.

Clinical Examination:

She was a quality well-balance, athletic filly with plenty of scope. She was well conformed, has good rein and was presented in excellent condition. She was examined in hand and found to be free moving. All clinical parameters were found to be within normal limits. There was no response to flexion tests. There was no clinical evidence of wear or injury to her extremities. This examination was conducted in hand.

Radiographic Examination:

Pre-sale there were radiographs available for inspection in the repository at the Magic Millions Complex. Upon examination there were no radiographic findings of any significance noted. She was considered low risk on radiographic survey.

Endoscopic Examination:

Pre-sale the video endoscopic examination of the upper respiratory tract submitted to the repository was reviewed endoscopically and the larynx and pharynx were found to be normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination the 2019 brown yearling filly **Lot 565 by Headwater ex Deodara** is in so far as can be determined from the examination conducted, suitable for syndication and as such, is suitable for all risk mortality insurance cover.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
10 February 2021
