## Tunnel Threadle Commitment!

### Skill Building:

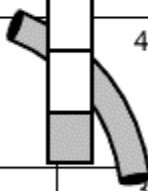

On a short, straight tunnel leave your dog in a start line facing the middle of the tunnel. Lead out and use your verbal cue word to cue either your "obvious" tunnel cue or your "opposite" threadle cue. Also add your toy as a distraction and proof your verbal "get it". We want both cues to be independent of body and motion and have strong enough commitment that we can run straight ahead while the dog is busy with commitment.

### Proof:

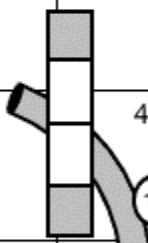

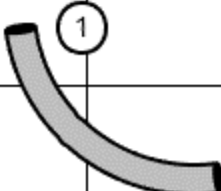

Same idea but now adding in some speed, motion and the distraction of a jump very close to the tunnel. Mix it up and test the understanding.
