

Tillson Spur Line Ry.—A press report states that the Canadian Milk Products Co. has bought this line and will relay the track with new ties and heavier rails and reballast it, to enable the heaviest traffic to run over it. The Canadian Milk Products Co. bought the Borden Co's milk evaporator plant recently and is installing new machinery. It is stated that the company has acquired all the stock and real estate of the railway from R. B. Moulton, who bought it about a year ago from Canadian Cereal and Milling Co., and that he retains running rights over the spur to the mill property which he bought at the same time from the C. C. and M. Co. The Tillson Spur Line Ry. Co. was incorporated by the Ontario Legislature in 1891, to build a spur line from the Brantford, Norfolk and Port Burwell Ry., in Tilsonburg, to the right of way of the Canada Southern Ry. spur line into the town, and thence to the intersection of Bunker Hill St. and John Pound St. The promoters were the Tillson family, millers, etc.

Toronto, Hamilton and Buffalo Ry.—
