

## **C.N.R. Lines Into Chibougamau**

On the Canadian National Rys. new line from Beattyville, Que., northeasterly to Chibougamau Townsite, steel has been laid from Beattyville to the Chibougamau River, 147.7 miles, we were advised officially March 21. It is being held up there for about a month, pending completion of the bridge over the river. Following completion of the bridge, laying of steel to Chibougamau Townsite, about 13 miles, will proceed.

On the new line northwesterly from St. Felicien to Chibougamau Townsite, grading on the contract covering the section between St. Felicien and Chigoubiche Lake, 64 miles, has been about half completed.
