The Newmarket Era

Page 8, col. 3

AURORA.

The Schomberg Railway is again practically out of business. Some time ago the old locomotive on the line broke down and the company then installed a gasoline engine in an old Metropolitan coach. This arrangement worked all right to take the coach out but they could not run back and as they have no means of turning the car at either end of the line it had to be abandoned. The mail is now taken from here by a rig hired by the company.

Railways: S. & A.Ry.
